

## Web Content Technical Product Document Sample

**The 2015 Timbersled LT Long Track Mountain Horse** has been completely re-engineering to significantly upgrade the overall performance. Timbersled's objectives with the 2015 LT were to have it handle and ride better on the trail than previous years' ST kits, to lower seat height, and to take deep powder and hill climbing performance to entirely new levels. The LT also offers a unique look all its own, and the new longer tunnel prevents the track from throwing powder forward toward the rider.

### Specifications

Drivetrain: Chain Case Chain JT520 X1R2 O-Ring. 54 Link (continuous) - Chain Slider  
Accessory: Disc Brake Type Wilwood Hydraulic Single Piston - Drive/Chain Case:  
Tensioner 15T Idler Sprocket - Jack Shaft: Sprocket 17 Tooth -6T spline - Lower Chain Case  
Sprocket 17 Tooth -6T spline - Track: Driver JT520 X1R2 O-Ring. 70 Link (master link) - Upper  
Chain Case: Sprocket 17 Tooth -6T spline - Dimensions: Estimated Dry Weight Front  
(lbs/kg) 18.5 / 8.4 & Estimated Dry Weight - Rear (lbs/kg) 120.0 / 54.4 - Overall Length 72 in  
(182.9 cm) - Suspension: Front Track Shock FOX® ZERO Pro® - Rear Suspension Pivoting  
Convex - Rear Track Shock FOX® ZERO Pro® - Rear Travel - Fixed Install Kit (in/cm) 12 /  
30.5 - Rear Travel - TSS Install Kit (in/cm) 21.0 in - Skag: Type Tri-Keel Hardened - Ski:  
Type 10" Backcountry - Track Width / Length / Height (in) 12.5 x 137 x 2.5
